REASONS FOR ALLOWANCE

4. Claims 1-8 are allowed.

Claim 1 is allowed because the prior art of record fails to disclose or suggest an analog switch which includes all of the limitation of this claim. In particular, the prior art of record fails to disclose or suggest the analog switch including a circuit for setting a potential of a gate of the first n-channel MOSFET to a potential of positive power supply voltage when the potential of the input signal is lower than the potential of the reference signal, and for setting the potential of the gate to a potential higher than the positive power supply voltage when the potential of the input signal is higher than the potential of the reference signal.

Claims 2-4 are allowed because they depend on claim 1.

Claim 5 is allowed because the prior art of record fails to disclose or suggest an analog switch which includes all of the limitation of this claim. In particular, the prior art of record fails to disclose or suggest the analog switch including a circuit for setting a potential of a gate of the first p-channel MOSFET to a potential of negative power supply voltage (or ground potential) when the potential of the input signal is higher than the potential of the reference

signal, and for setting the potential of the gate to a potential lower than the negative power supply voltage (or ground potential) when the potential of the input signal is lower than the potential of the reference signal.

Claims 6-8 are allowed because they depend on claim 5.
